### Question No. 1

After configuring a DRS policy in your Oracle VM environment you decide to test it by forcing one of your guest to 100% CPU utilization. After 5 minutes nothing happens. List two possible reasons for this.

- **A.** You left the monitoring period at default 10 minutes and Oracle VM has not gathered the second performance samples.
- **B.** You have not told Oracle VM manager to start gathering performance matrix which is related to compare for the sample against.
- **C.** Even though the guest CPU utilization is above the DRSCPU threshold it was not enough to bring the VM CPU utilization above the threshold.
- **D.** You should not publish the policy to all over the Oracle VM servers yet so they don't know what the thresholds are.
- **E.** The DRS policy updated is in direct conflict with the default DPM policy. You should correct this before continuing.

**Answer:** A, E

### Question No. 2

You have just finished successfully upgrading an Oracle VM server from VM manager GUI. When attempting to migrate some of your VMs back to upgraded server it does not appear in the list of available server. What is the most likely reason?

- **A.** There is another update available and it should be applied before you can migrate your VMs.
- **B.** All the Oracle VM server in the environment should be upgraded before the VMs can migrated to the upgraded server.
- **C.** The server should be taken out of maintenance mode before you can migrate any VM back to it.
- **D.** The server should be move backed to the same server pool as it was prior to the upgrade.
- **E.** You should update all VMs to re-authorize the upgraded server so that it has permission to run the VMs.

**Answer:** C

### Question No. 3

You have guest VM on an Oracle VM server that cannot communicate with the internet. The guest UUID is 12345. Which two commands on Oracle VM server will have troubleshooting this issue?

- **A.** `ovmm netstat --a` to get the current status of all network connections.
- **B.** `dom0-system-display-network` to show the status of all network interfaces.
- **C.** `ifconfig --a` to display list of network interfaces and their current status.
- **D.** `xm network --list 12345` to get the list of virtual interfaces attached to the guest.
- **E.** `esxlist --v 12345` to list all the network interfaces attached to the guest.

**Answer:** C, D

### Question No. 4

Identify the three components of the JeOS tool kit.

- **A.** A command line utility to customize and create a system image.
- **B.** Microsoft template system image.
- **C.** Oracle Linux template system image.
- **D.** Red Hat Linux template system image.
- **E.** The predefined YUM repository of customized RPMs.
- **F.** Script used to configure and clean up the template.

**Answer:** C, E, F

### **Question No. 5**

What are the minimum component that comprised a template imported by Oracle VM manager?

- **A.** One virtual disk image (.img) file.
- **B.** A configuration file (.vmx) and virtual disk image (.vmdk) file.
- **C.** A virtual machine configuration file (vm.conf), a metastate file (.vix), a BIOS file (.nvram) and one virtual disk image (.img) file.
- **D.** A virtual machine configuration file (vm.conf) and at least one virtual disk (.img) file.
- **E.** One disk image (.img) containing the root file system and another disk (.img) containing the boot file system.

**Answer:** D
